Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: claims 17-45 have been canceled as being drawn to an invention non-elected without traverse.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: applicant's amendments have defined over the prior art of record and placed the application in condition for allowance. There is no suggestion of providing the Chandrasekaran et al device with a fixed and non-rotationally mounted tip electrode since that reference requires the electrode to be rotated to perform the desired procedures. None of the other prior art references disclose the particular catheter device having the specific tip electrode having irrigation passages, an infusion tube in communication with the irrigation passages, an ultrasound transducer mounted on a surface of the electrode and a sensor mounted near the transducer as now recited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
